COMOR-D-24/65

17 June 1963

MEMORANDUM FOR: Committee on Overhead Reconnaissance

SUBJECT: Objectives for [REDACTED] Reconnaissance in Cuba

25X1A

The COMOR Working Group met on 12 June (0930-1615) and subjected COMOR-D-24/48 to an intensive review. The targets for low-level coverage that were recommended in February were examined individually in the light of all-source intelligence acquired during the past few months, and a revised listing was compiled which represents the present consensus of the Working Group members. Attached for consideration by the COMOR is the new listing, arranged in order of priority, including a brief description of each target. The coordinates of these objectives will be spelled out in more detail upon completion of a study currently in progress at NPIC.
